F.I.I. Business Email Account

You share your passion with your clients by offering them the most cutting edge freediving training. You are an F.I.I. Professional. What makes you professional and sets you apart from your competition? The quality of your product, your abilities and work ethics, and your professional business image. A business email address is another great addition to making the right first impression.

F.I.I. is now offering `firstname.lastname@freedivinginstructors.com` to all active Instructors for annual maintenance fee of 20.00 USD. You will be able to access your email either via Webmail using your internet browser, or via your email client. You can register for your F.I.I. Professional Email Account through the Instructor Shop. After the initial registration, you will have the option to renew this service during your annual membership submission.

Webmail

Webmail allows you to access your email from any computer with an Internet connection and a web browser. Please make sure to log out when checking your email on public computers so that other people cannot read your email.

You can check the webmail for any account by logging into <https://freedivinginstructors.com:2096> with the full email address and password for the email account.

Email Clients

To check your mail through a desktop application, you will need to configure the application. You will need to use the full email address and password when configuring your account from an email client. It is a good idea to check "My Server Requires Authentication" as most mail servers require this option.

Secure SSL/TLS Settings (Recommended)

Username:	firstname.lastname@freedivinginstructors.com
Password:	Temporary password will be sent to you
Incoming Server:	gator1764.hostgator.com <ul style="list-style-type: none">• IMAP: Port 993• POP3: Port 995
Outgoing Server:	gator1764.hostgator.com <ul style="list-style-type: none">• SMTP: Port 465

Authentication is required for IMAP, POP3, and SMTP.

Non-SSL Settings (NOT Recommended)

Username:	firstname.lastname@freedivinginstructors.com
Password:	Temporary password will be sent to you.
Incoming Server:	mail.freedivinginstructors.com <ul style="list-style-type: none">• IMAP: Port 143• POP3: Port 110
Outgoing Server:	mail.freedivinginstructors.com <ul style="list-style-type: none">• SMTP: Port 25

Authentication is required for IMAP, POP3, and SMTP.

Notes:

- IMAP email access coordinates between the server and your mail application. Messages that have been read/deleted/replied will show up as such, both on the server and in the mail application.
- POP3 does not coordinate with the server. Messages marked as read/deleted/replied to in the mail application will not show up as such on the server. This means that future mail downloads with POP3 will show all messages as unread.
- Outgoing mail is sent using SMTP.
- We recommend using POP3 over SSL/TLS or IMAP over SSL/TLS since they provide increased security for your interactions with the remote mail server.
- Without prior external back up, expiration of your F.I.I. Membership or discontinuation of the F.I.I. Professional Email Account will result in loss of your email correspondence.
